Database

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

A;Title: Cloning of the cDNA coding for rat brain CMP-NeuAc:GD3 alpha2-8 sialyltra
A;Reference number: JC6321; MUID:97225806; PMID:9073076
A;Accession: JC6321
A;Molecule type: mRNA
A;Residues: 1-380 <ZEN>
A;Cross-references: UNIPROT:P97877; GB:U55938
A;Experimental source: brain
C;Comment: This enzyme is one of the sialyltransferases and adds one more alpha-2, C;Superfamily: alpha-1-acetylneuraminate alpha-2,8-sialyltransferase
C;Keywords: glycosyltransferase
C;Keywords: transmembrane #status predicted <TMM>
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     RESULT 6

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Total number of hits satisfying chosen parameters:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Scoring table:
             Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              B B
